Hi Dave - I'm not going to be able to get you an answer by Friday. Tom has indicated he may take this decision to Council. If he does, it could take a couple of weeks. As such, Tom would like to know what is driving the deadline.

Have you received a response from Edina yet? If so, may I ask what it was? Did you coordinate it through Dave Goergen?

Thanks again - sorry I couldn't get you a quick turn on this one.

Mark

Good afternoon;

The MPCA is in the process of listing the chlorinated solvent plume that affect SLP wells 4 and 6 as well as Edina wells 2, 7, 13 and 15 and likely resulted in the chlorinated solvent vapor problem addressed several years ago. We believe this is a necessary step to access additional funds for identifying the chlorinated solvent release source. EPA has asked if the cities support listing the site on the Federal Superfund list. My feeling is yes there is support since we want the responsible party to be involved in the cleanup and remedy. But, I do not want to make assumptions. If you could, please acknowledge that the city does support listing the chlorinated solvent plume and I will forward that information on to EPA.

If you have questions, please let me know.
